

Reference your recent proposal to expand Low Power FM stations. I want to advise you of a station that appears on many translators throughout the United States, including my community. K-LOVE Radio located at 100.1 FM in San Diego County has provided me a much needed "family oriented" radio choice that I want my children to hear.

K-LOVE provides local updates about upcoming events our family wants to know about, but never hears on commercial radio.

If K-LOVE were to be displaced by another provider, I would not have a single radio station to listen to in my area that provides the type of programming my family wants and needs. Our County is as big as the state of Connecticut, that's a big area to have no representation. Please don't let this happen. Our Community needs the positive and encouraging music that K-LOVE provides, as well as the local community events that our family wants to know about.

You have successfully kept the vulgar and obscene "performers" off of public airwaves, please don't force off the kinds of stations that you would feel safe having your children listen to.

Respectfully Submitted;

Dean J. Taylor.
